With my 3 years of IT experience in Software and Web Application Development. I have been developed various business application like – Garments ERP, Budgetary Control System, Agricultural Budget Management and transaction system, USI BD Control MIS, Content management system, Point of Sale, School Management System, Production Management application, Forum Discussion and many more.

Throughout my professional career, I have been developing business applications whether it is web based or desktop application including Web/Windows Services. I have been exercising Java and PHP platform for development. I am using Java SE, Java EE, Spring, Object Oriented PHP, CodeIgniter, Laravel technologies for business layer development. For presentation layer I have been using HTML 5, CSS3, Bootstrap, JQuery/JavaScript, Ajax, vue.js, Angular.

I am a quick learner and with my knowledge, I want to make a sound position in software industry and work enthusiastically in team to achieve goal of the organization with devotion and hard work. I feel confident that I am the right person to help your company reach the next level of success.
